Stop the Hackers & Free Your Data

Zones Security Solutions

Tanuj Garg
Cybersecurity Practice Lead

Introducing Security Solutions from Zones

Being safe is your first step.

Being smart is second.

Security is everyone's primary concern. As the complexity of systems increases, so do the vulnerabilities of your technology and the people you're trying to protect.

Let's talk about your unique needs and some smarter ways to keep your data and organization safe, now and into the future. Zones Security Solutions

IT Security Industry Challenges

"**There are only two types of companies**:
those that have been hacked,
and those that will be."

Robert Mueller
FBI Director, 2012

Ransomware Readiness Requires Closing the Gap

Digital transformation and resiliency strategies need to be in lock step.

RECOVER when, not if, ransomware strikes

- Orchestrate
- Control
- Avoid ransoms

DETECT threats, enable monitoring

- Users
- Infrastructure
- Backups

PROTECT all your data

- Everywhere
- Immutably
- At scale
