

“Take control of (and secure) your Cloud computing in 2019”

Graham Collinson – COO of CloudCoCo

Agenda

- Introduction
- Why CloudCoCo exists?
- How we do things differently
- What do we do?
- CoCo Security as a Service Ecosystem
- CoCo Innovators: OnDMARC
- CoCo Innovators: MPP – Managed Document Solutions
- Get in touch

Why CloudCoCo Exists?

We got frustrated with hearing “it’s impossible”

We DO NOT want to own anything

The technology status quo feels pretty archaic

Client-centricity & engagement is notably absent

Customers are not meeting innovators

We want to match up to your impatience

Why CloudCoCo Exists?

We make the impossible possible

We do things quickly

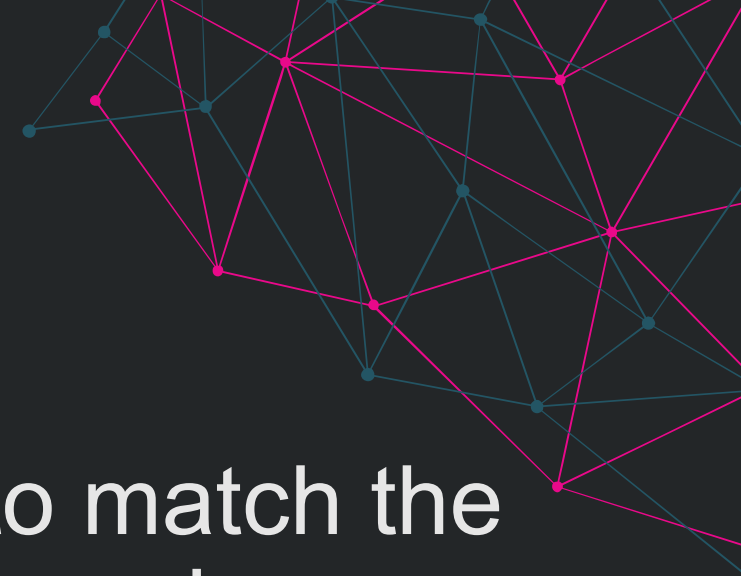

Our processes have been designed client-first

We've built an ecosystem of innovators

We are independent and agnostic

We are always looking to collaborate

The Short Version

The UK's MSP space hasn't evolved to match the needs of clients in 2018 and beyond.

We should not accept this

What do we do?

Cloud – Alibaba, AWS, Azure

Connectivity

Collaboration

Hardware

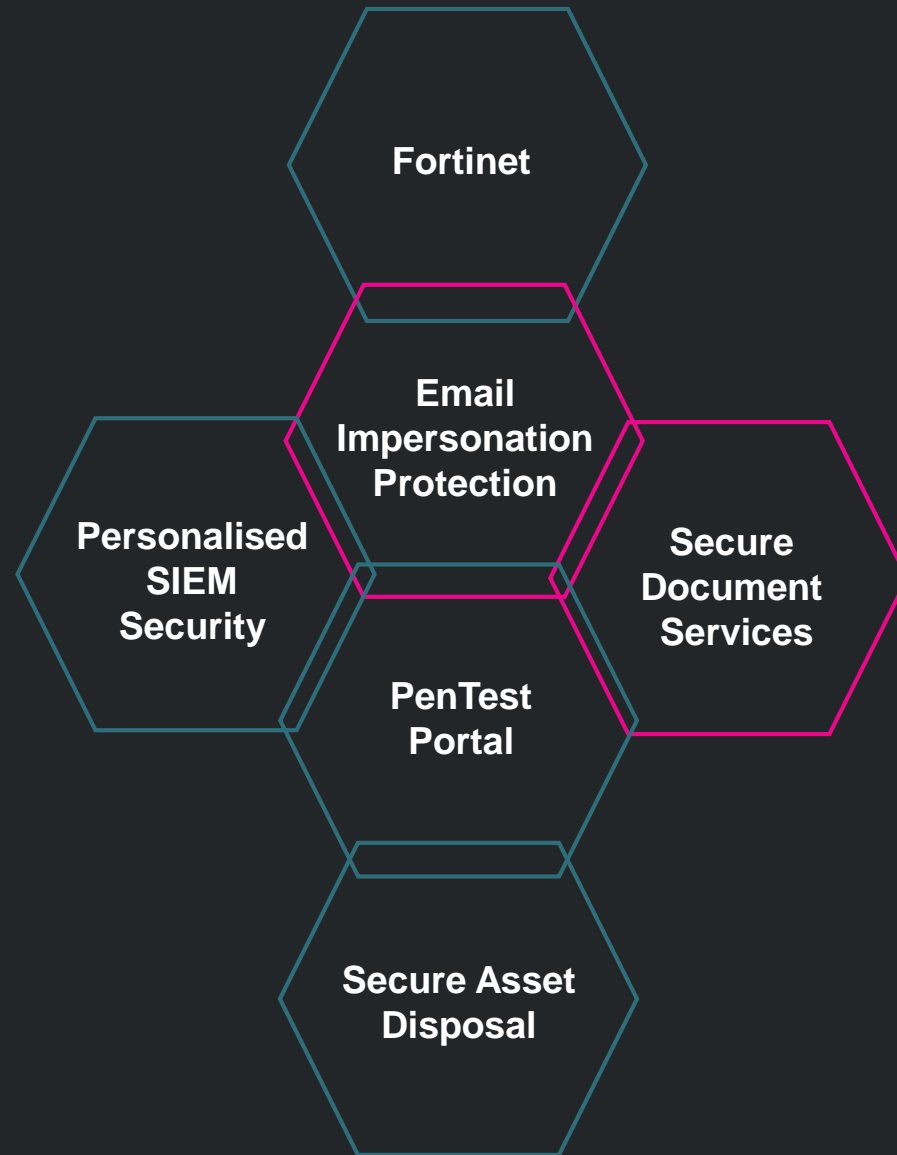

Next Gen Professional Services

Managed Document Solutions

Security

Innovation Hub

CloudCoCo Security as a Service Ecosystem

Next-gen protection against email impersonation

NCSC

recommend DMARC
to prevent phishing
attacks

91%

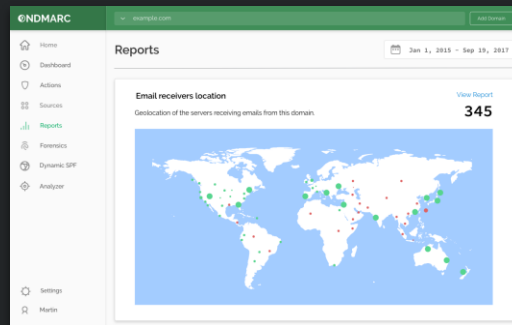

of cyber attacks start
with a phished email

UK & US

Governments have
mandated DMARC
as a must-have for
suppliers

OnDMARC makes DMARC accessible

INSIGHT

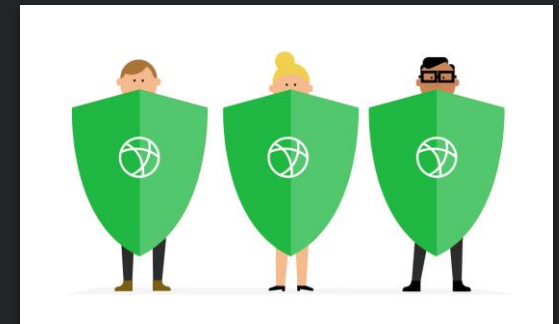

ACTION

The screenshot shows the 'Actions' section of the OnDMARC interface. It features a '14 days' timer and the text 'Follow these actions based on DMARC reports to improve your security status. Actions elapse in 14 days.' Below this, there is an 'Action' card with instructions: 'G Suite needs custom DKIM and SPF configurations to be compliant with DMARC. Here are the instructions:' and a 'Setup Instructions' button. At the bottom, there is a 'DMARC Validation Failures' section with a table.

Type	Name	Email sender?	Reports
<input type="checkbox"/>	Grubwell	<input type="button" value="Yes"/> <input type="button" value="No"/>	>

PROTECTION

CoCo Innovators - OnDMARC

Rapid deployment for fast protection

10 Mins

Set-up

10 Days

To get meaningful data from major email service providers

10 Weeks

To get to P=reject protection

CoCo Innovators – MPP Managed Document Solutions

Improving the security and compliance of your documents

GDPR

Compliance covers
print documents and
data

94%

of print apps are not
secure enough for
enterprise

46%

of managers are
aware sensitive
documents are going
missing

CoCo Innovators – MPP Managed Document Solutions

Document security in four easy steps
