

Overview of Cyber threats

Nestor Alfonso Santamaria

What I'll cover

- UK's view on the current state of cyber threats
- What it all means
- What lies ahead

Current state
of cyber
threats

UK's view

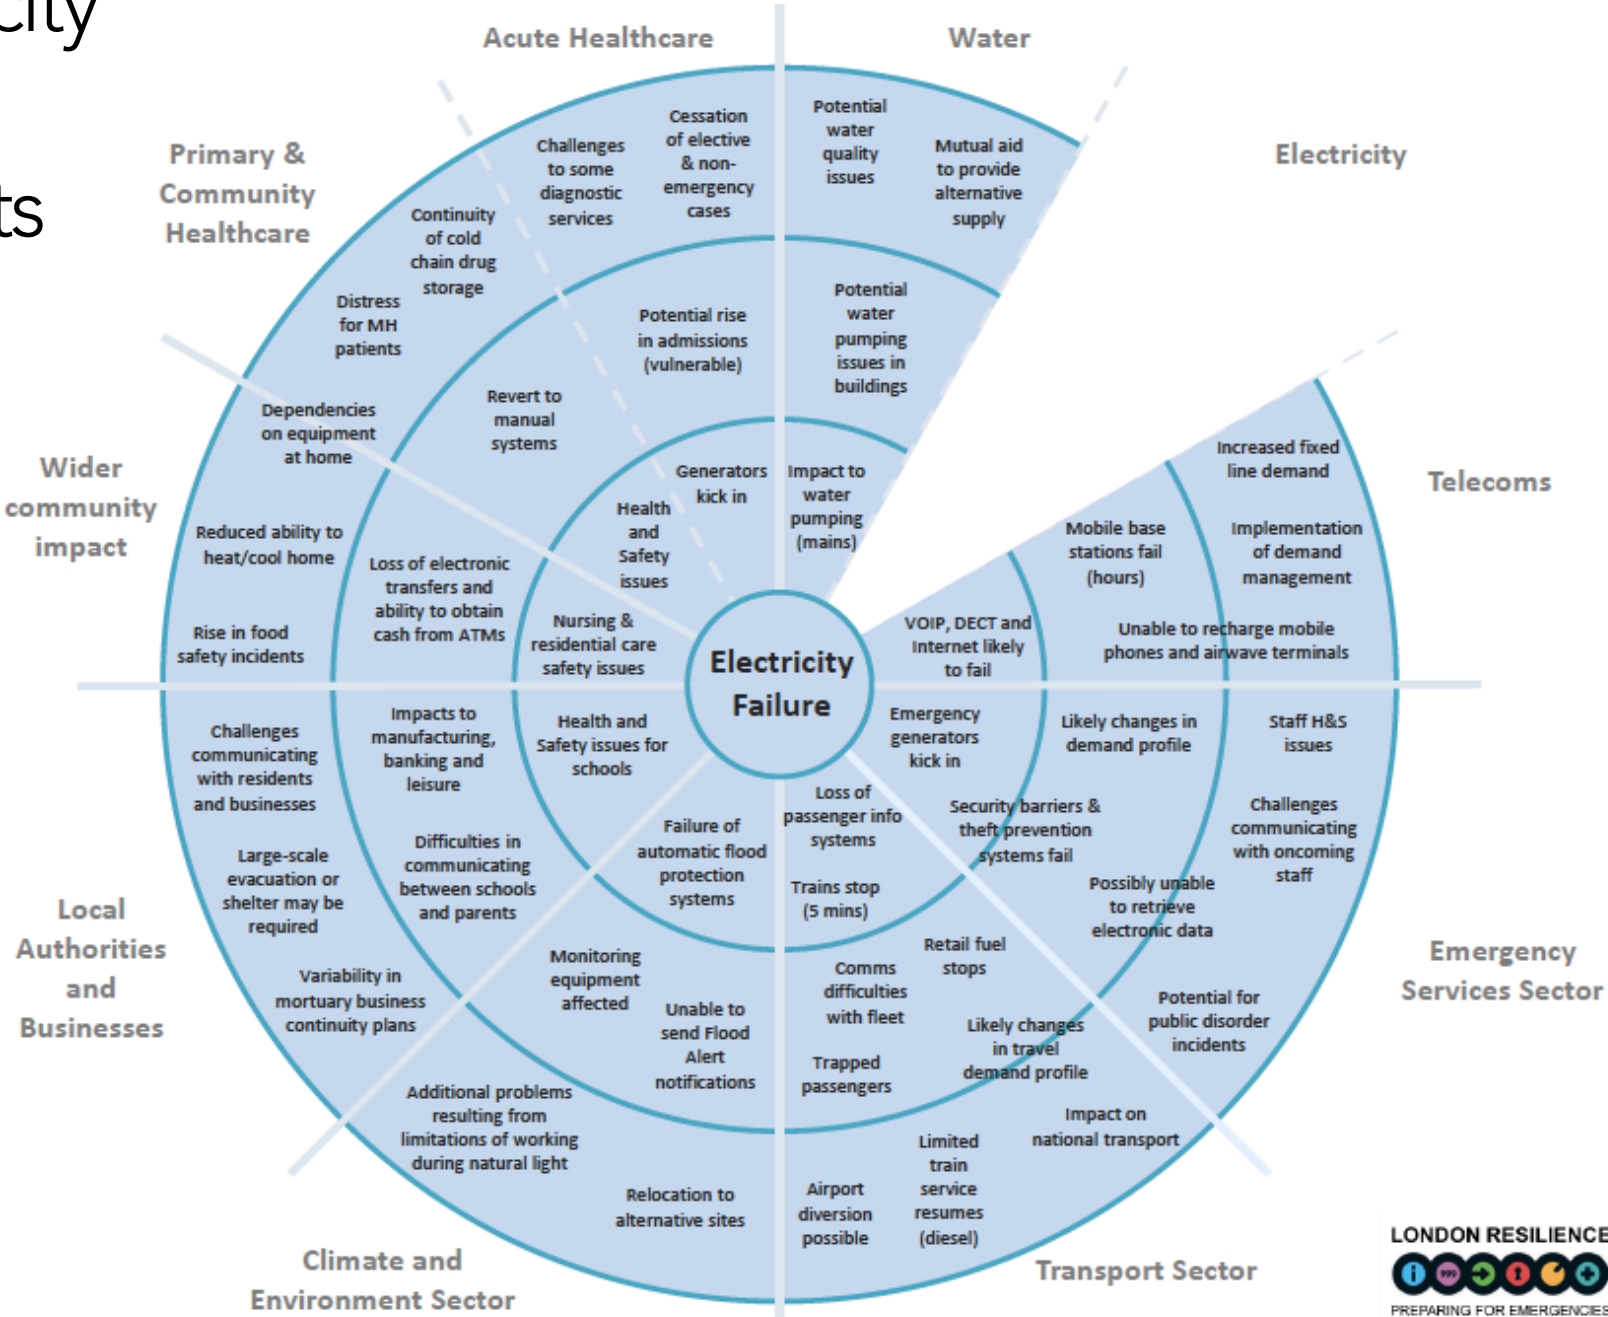

Consequences of a cyber attack may include:

- possible fatalities and physical casualties;
- loss of availability, by denying legitimate access to systems and information services;
- loss of confidentiality, through information being stolen or released;
- loss of integrity, where data is damaged or corrupted;
- possible disruption to critical services, such as energy or health;
- economic damage, particularly to business; and
- reputational losses.

What it all
means

Electricity failure impacts

The National Cyber Security Strategy

NATIONAL CYBER SECURITY STRATEGY 2016-2021

Our vision: we are secure and resilient to cyber threats, prosperous and confident in the digital world

DEFEND

against cyber threats

DETER

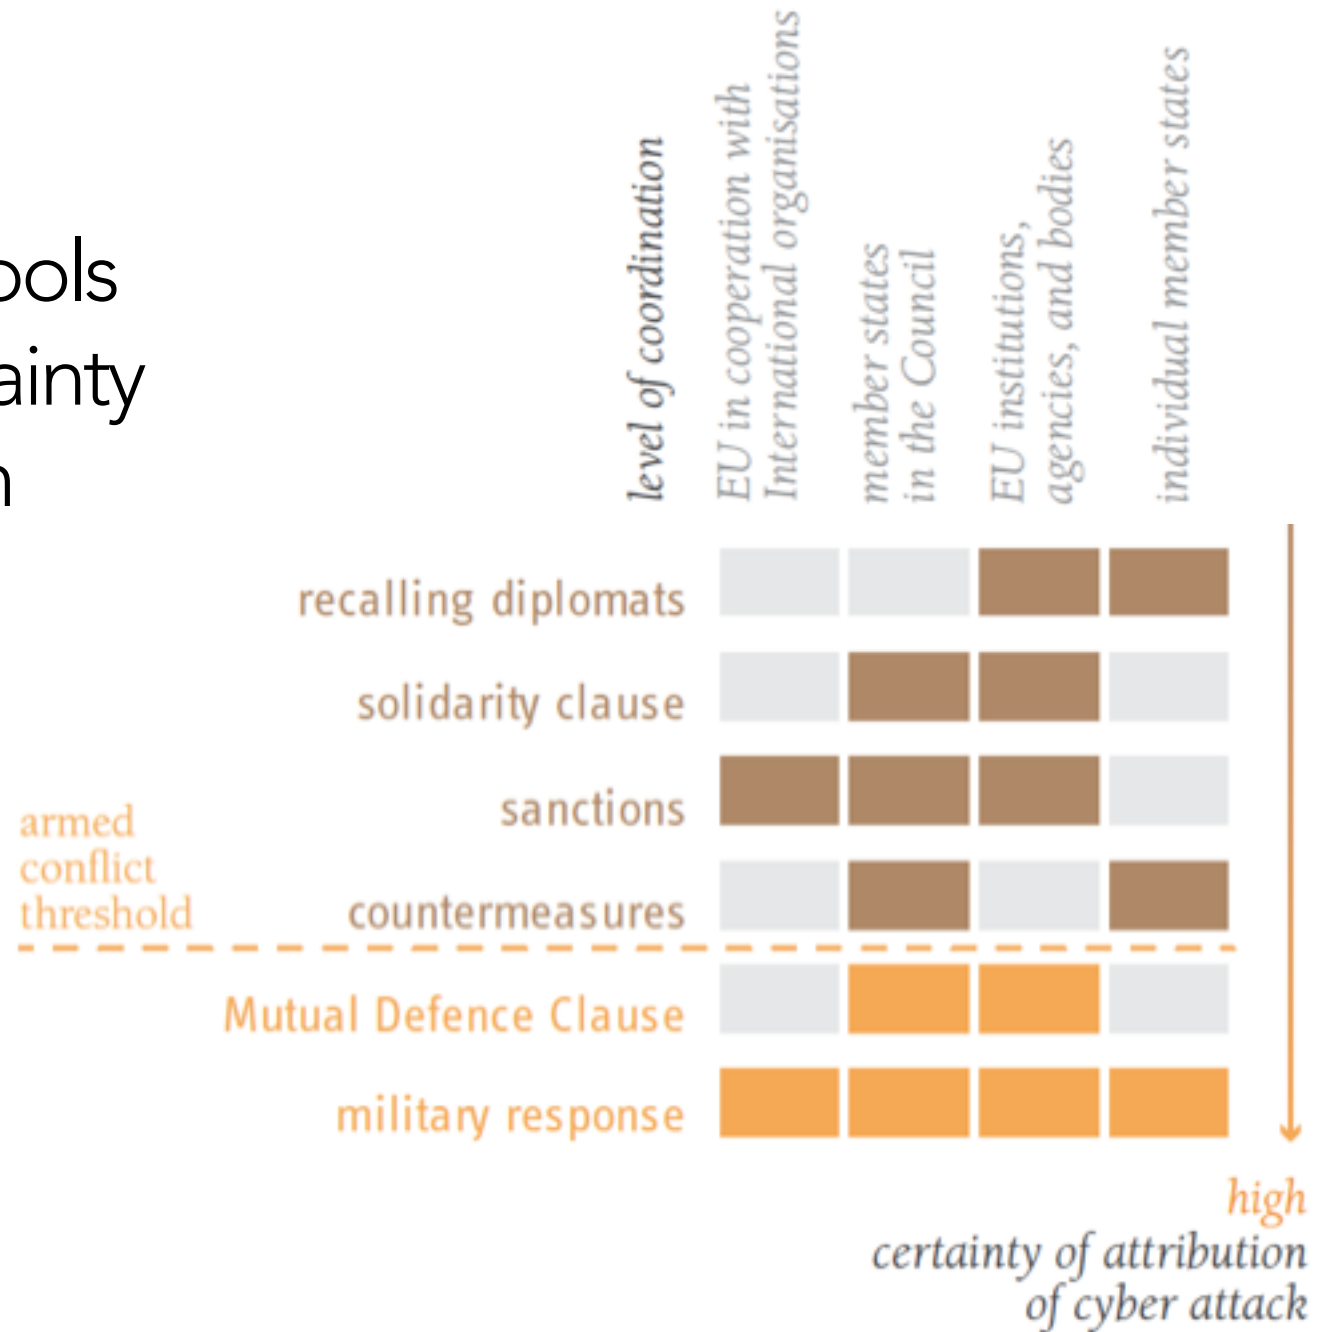

our adversaries

DEVELOP

our skills and capabilities

EU Cyber diplomacy tools and the certainty of attribution

What lies
ahead

REGULATION

European Insurance and Occupational Pensions Authority

Supervisory Convergence Plan 2018-2019

- Improve supervision of data and IT-related risks, including cyber risk
- Develop good practices on the supervision of data management, data quality and IT security and governance.
- Work on common supervisory expectations on insurance undertakings' practices on cybersecurity and explore efficient ways to perform a cyber attack test.

Future risks

- Leveraging the internet of things for attacks
- State-sponsored acquisitive cyber attacks
- Cyber as a new domain of warfare
- Cyber weapons race
- Malicious uses of artificial intelligence
